

## Who are we?

### About us:

**Geoalert** is a fast-growing tech startup with a global reach. We unite expertise in Software Engineering and Geospatial AI. Our platform, **Mapflow AI**, processes aerial and satellite imagery to extract valuable insights across multiple industries. Today, Mapflow is used by over **2.5K monthly users** in the **US, Indonesia, Brazil, Russia, Turkey** and beyond.

We are a growing tech company where you have great chances to develop your career and move from routine to ideation and creativity.

We have a passion for maps and data.

### We are looking for:

## Product Analyst (SaaS)

### Your main goal:

Take ownership of product metrics and turn data into decisions that improve user experience, retention, and revenue.

### Core responsibilities:

- Define, track, and analyze key SaaS metrics that are more relevant to our product (Geospatial imagery analysis platform)
- Update and improve our dashboards and reports (Superset, SQL, Google analytics)
- Identify growth opportunities and bottlenecks in the user journey
- Form hypotheses and validate them with data
- Translate business questions into analytical frameworks

### Customer-facing analytics focus:

This role is not about sitting with dashboards and reports. We expect you to work closely with the team, in particular:

- Helpdesk team — to analyze support cases, and improve onboarding and UX
- Sales team — to understand presale objections, conversion, and pricing feedback

- Product & engineering — to prioritize improvements based on measurable impact

**What will make you stand out:**

- Strong understanding of SaaS business models and subscription metrics and corresponding tools
- Experience with Geospatial tools (Mapbox, QGIS, Python, whatever...)
- Experience with product-led growth models
- Proactive mindset: you don't wait for tasks, you identify opportunities

**What we offer:**

- Direct impact on product strategy and company growth, including the option package
- Access to real global SaaS data with thousands of active users
- Fast decision-making and no corporate bureaucracy
- Remote or hybrid work ( 📍 Tashkent office)
- Opportunity to grow into Head of Product Analytics or Product Manager role

Shoot us your CV to [hello@geoalert.io](mailto:hello@geoalert.io) — we'd love to talk.
